Alvord Center Engaged Citizenship Matrix

Seek Knowledge:
- Explore one's cultural and environmental identity
- Investigate how history, culture, and science shapes the modern world.
- Examine local, global, and environmental trends.
- Acquire cross-cultural and scientific methodology competencies

Enhance Understanding
- Question prevailing assumptions
- Analyze connections between local and global issues
- Recognize and evaluate local and global implications and shared actions
- Develop empathy for other perspectives

Develop Skills
- Adapt to new environments and challenges
- Expand active listening, open communication, and self-reflection techniques
- Apply a global and environmental lens to critical thinking and problem solving exercises
- Seek and identify opportunities for collaboration

Take Action
- Engage in civil discourse to raise awareness and promote understanding
- Empower action through research-driven projects
- Create innovative global and environmental solutions for the common good
- Act cooperatively to implement globally and environmentally focused positive change

Learning Objectives:
Seek Knowledge
Enhance Understanding
